

Submersible Pumps and the Wastewater Industry

*Supplying Quality
Replacement Seals
for Many
Wastewater Pump
Manufacturers*

Introduced in the late 1950s, submersible pumps have come to dominate the wastewater industry. U.S. SEAL MFG. is your primary source for mechanical seals for these challenging environments.

For more than 60 years, the wastewater industry has relied on U.S. SEAL MFG. as a trusted partner, supplying replacement seals for both domestic and off shore manufactured equipment.

Providing reliable, high quality products, supported by our knowledgeable and experienced staff, we understand the challenges of your most demanding applications.

- A-C Pump
- ABS USA
- Aurora®
- Baldor-Reliance

- Hanjin Pump Co.
- Hydromatic Pumps
- KSB
- Smith & Loveless
- Tsurumi Pump
- Wilo-Emu®

Flygt and Wilo-Emu® Replacement Seals

WEMCO®—Hidrostal Replacement Seals

Lower Seal

- Spring is covered by elastomer boot, which prevents seal clogging from stringy material
- Durable Viton® Elastomers and Tungsten Carbide Primary Ring vs Sintered Silicon Carbide Mating Ring
- Accompanying upper seal is a standard U.S. SEAL MFG. Type C

Contact us for upper and lower seal part numbers and available materials.
